HISTORY. In 1881, the Ross Marble Company began extracting Tennessee marble at Mead's Quarry for use in buildings and monuments in Knoxville, New York, and Washington, D.C. John M. Ross operated the quarry to the south. The Great Depression ended the marble boom and from the 1940s onwards only agricultural lime and gravel was produced at these sites.

NATURAL RESTORATION AREAS
Trails and Points of Interest
A 300-acre, post-industrial, natural area characterized by ongoing restoration efforts and natural reclamation.

Mead's Quarry Lake
This 25-acre lake has swimming, fishing, and biking platforms for birds and turtles. As times freshwater jellyfish can be seen here. State license required for fishing.

Imerys Trail (1.0 mile)
Named after the company that donated the 103-acre, Ross Marble Natural Area, this trail leads right through the heart of the rugged property with connections to the quarry gorge and multi-use trails.

Pink Marble Trail (0.4 miles)
A scenic, multi-use trail along the lakefront named after the pink Tennessee Marble extracted for use in local and national buildings and monuments. The trail leads to an observation deck offering expansive views of the lake.

Tharp Trace (1.1 miles)
Looped trail, steep in places. Named after Minnie Tharp who championed the restoration of Mead's Quarry. Views of the lake and Mt. Le Conte, plus the historic Stenton Cemetery, punctuate long stretches of woodland canopy along the trail above the cliffs.

Ross Marble Quarry Loop (0.25 miles)
The rock bridge provides panoramic views of the former quarry site, while underneath, the “keyholes” provides access to the lower quarry featuring carved Tennessee marble shelves and rock faces.

Hayworth Hollow (0.1 mile)
Named after long-time IJams champions, Dr. Ray and Christene Hayworth, this stunning trail follows the quarry gorge lined with moss-covered boulders and sheer rock walls. Gates protect native wildlife, including bats and the rare and threatened Bittern cave salamander.

Safety First: Please be careful when exploring IJams' natural areas, especially near water and high points. Do not climb rocks or proceed past safety barriers, which have been erected for visitor safety. Access to Mead's Quarry Lake for swimming or boating is prohibited due to falling rocks and underwater currents.
